

## Grove City Area School District

### Hillview Elementary School Additions and Alterations

Additions and alterations to Hillview Elementary transformed the building into a state of the art facility for the early learners.

With a focus on project based learning, STEAM labs are created for the K-1, 2-3 and 4-5 grade levels to allow development to progress while the students mature.

The design is extremely theme driven and allows for every component of the building to be a learning tool.

Large windows and bright colors create a great environment for learning.

**“It makes the school feel more happy”** - Abby (8-year-old Hillview student)

Completed:	2020
Size:	160,000 SF
Cost:	\$30.8 Million

The building STEAM design theme is on full display in the media center with gears and shapes fashioned in bulkheads and ceiling features to define group learning spaces

STEAM classrooms for each grade level groups are equipped to support the learning activities for that level. Multiple classrooms are interconnected with garage doors to support project-based learning

CRA YON

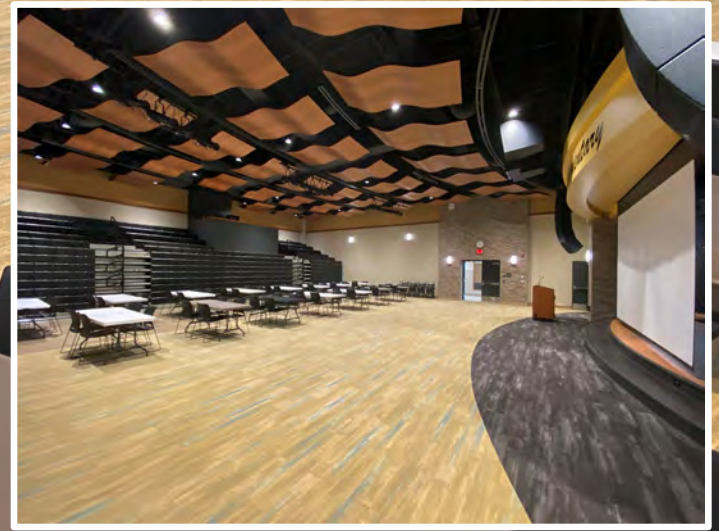

BIBL. CLASSROOM

*Hillview Elementary*

The Large Group Instruction room is a flexible space that can utilize as an open area or pull-out bleachers allow for presentations and performances to an entire grade level.

Space is precious. Even areas under staircases are utilized for Small Group Instruction.

Outdoor spaces were designed for gathering and learning.

Ceilings in STEAM learning classrooms and in the corridors were left open to reveal the way the building works. A color code designates the function of each pipe or duct.
